

New Product

Wheel-Link

Stand
D172

The "**Wheel-Link**" is an additional accessory designed for medium range scooters.

Scooters are a wonderful way of increasing mobility and freedom.

However, many scooters are too big to enter shops, restaurants, houses or doctor's surgeries. Unfortunately there has been nowhere to store and transport your wheelchair or walking aid.

Until now...The 'Wheel-Link' allows you to attach and carry your wheelchair or walking aid on the back of your scooter allowing easy access and increased independence.

Now, that's freedom for you!
